GERI2MC - Introduction

Introduction

GERI2MC - Teaching profile

Learning outcomes

The objective of this Advanced 2nd cycle programme is to prepare doctors to gain professional status as specialist doctors in geriatrics (Ministerial Decree of 29/07/05 published 19/08/2005).

Programme structure

The training comprises full-time placements in approved departments and a taught course. It lasts for at least six years on a full-time basis and comprises basic training of three years and advanced training for a further three years. The placements include duty activities. The proposed placements organized by the interuniversity placement coordinators must be approved by the ministerial committee for geriatric specialization for the whole course or by the committee for internal medicine for the core subjects and subsequently the geriatrics committee for the three years of specialization. This enables specialization to be chosen at the end of the core subjects. However, the committee for geriatric specialization may approve a full plan for candidates who specialize from the outset.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document *"In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"*

The document is available by clicking [this link](#) after being authenticated with your UCLouvain account.

GERI2MC - Information

Admission

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.
Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.
The admission requirements must be met prior to enrolment in the University.*

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

- [General requirements](#)
- [Specific Admission Requirements](#)

General requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Specific Admission Requirements

First part

Special procedures :

- candidates must have a degree as a Doctor or Master in medicine or a doctor from a member country of the European Union which enables them to practise in Belgium
- candidates must show evidence of having been selected, at the end of the competitive selection examination, for internal medicine specialization at a Belgian faculty of medicine

Further information about the legal requirements and the practical details of the selection examination may be obtained from the office. Holders of degrees from outside the European Union may only enrol for this programme to obtain a university certificate in partial specialized training lasting two years (if they are taking a specialization in their home country) or advanced specialized training lasting one year (if they are already recognized as specialists in their country of origin.)

The Royal Decree of 30.05.2002, published on 14.06.2002 on the availability of medical studies, amended by the Royal Decree of 11.07.2005 published on 03.08.2005, applies to candidates who wish to be awarded the status of specialist in geriatrics.

Second part

Candidates must have fulfilled the requirements of the first part of the specialized studies in internal medicine and have been accepted for advanced training in geriatric specialization.

Applications should be submitted to the academic in charge of the programme. The selection examinations are held in accordance with the schedule and the general examination regulations.

All candidates who wish to become geriatric specialists, either from the outset or after the three years of basic training, will be assessed by the academic in charge of the programme as well as the selection committee and the geriatric placement supervisors.

Selection committee

First part (before the beginning of the basic training)

The selection committee is made up of members of the selection committee for the Advanced Master in Internal Medicine.

Second part (before the beginning of the advanced training)

The selection committee is made up of members of the programme committee together with two invited members from the geriatric placement supervisors in the UCL network.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Clinical assessments in writing on pre-established criteria are organized each semester by each candidate's placement supervisor and each training section. Assessments for all the candidates are examined by all the placement supervisors at six-monthly meetings.

First part

At the end of the three-year basic training, each candidate is assessed at an interview designed to test their general knowledge of internal medicine. In accordance with the Royal Decree of 16 March, candidates will receive an official certificate to show they have successfully completed a special university training course.

Second part

At the end of the three years of advanced training, each candidate is assessed on their in-depth knowledge of geriatrics, according to the following criteria :

- certificate showing attendance of the inter-university course on geriatrics
- production of a dissertation of between 20 and 25 pages
- presentation of a paper to the Belgian Scientific Society for Gerontology and Geriatrics (Société Scientifique Belge de Gérontologie et de Gériatrie - SBGG)
 - or an equivalent Belgian or foreign society, or publication of an article.

When the above requirements have been fulfilled, the programme committee will award the academic degree of Advanced Master in Geriatrics. This is not a substitute for recognition by the ministerial committee. It is evidence of academic and scientific training in the context of specialized training leading to the award of professional status.
