MEFY2MC - Introduction

Introduction

MEFY2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become officially recognised holders of the specific professional title of Specialist Doctor in Physical and Rehabilitation Medicine (Ministerial Decree of 20.10.2004, published on 22.11.2004).

Programme structure

The programme includes full-time apprenticeships in approved services and teaching centres. It lasts at least five years, full-time, and includes at least 4 years of studies dedicated to specific diagnostic techniques and treatment in the domain of Physical and Rehabilitation Medicine, including the socio-professional reintegration of handicapped persons. At least one year is dedicated to various techniques in preparation for the carrying out of neurophysiological examinations.

The practical training project, established by the university promoter, must be approved by the ministerial validation committee for the speciality. These apprenticeships include being on call.

N.B. the candidate will need to accomplish a one-year work experience period abroad, in a service approved by the Committee for Physical and Rehabilitation Medicine, or in a research laboratory, preferably in the third or the fourth year of studies.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "*In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?*"

The document is available by clicking [this link](#) after being authenticated with your UCLouvain account.

MEFY2MC - Information

Access Requirements

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.
Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.
The admission requirements must be met prior to enrolment in the University.*

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

- [General access requirements](#)
- [Specific access requirements](#)

General access requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Specific Admission Requirements

Admission conditions

- The applicant must hold the degree title of Doctor in Medicine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Physical and Rehabilitation Medicine, in a Belgian medical faculty.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of the 30.05.2002, relating to the planning of the medical offer for the public, published on the 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Physical and Rehabilitation Medicine (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of training, the candidate will apply for an attestation proving that he has successfully accomplished a specific university training course.

The evaluation and final exam are based on :

- the presence and active participation in the lectures on the speciality (see work training notes),
- the presentation of a scientific piece of work before a national or international audience
- the publication of a piece of work with the candidate as the principal author.

In addition, the global evaluation will include the result of the European Board exam for Physical and Rehabilitation Medicine, as well as the evaluation conducted by the different training supervisors on the ability and clinical aptitudes of the candidate to practise Physical and Rehabilitation Medicine. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Physical and Rehabilitation Medicine.

This title does not replace official recognition by the ministerial validation committee. It attests to the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
