MINLING - Introduction

Introduction

MINLING - Teaching profile

Learning outcomes

On successful completion of this programme, each student is able to :

1. Acquérir et démontrer une compréhension d'un socle de connaissances en linguistique afin d'en saisir les spécificités.
2. Démontrer une connaissance et une compréhension des outils de base en sciences du langage.
3. Découvrir et saisir la rigueur exigée par la linguistique et les principales disciplines constitutives des sciences du langage ;
4. Faire preuve d'une capacité de raisonnement spécifique à la linguistique
5. Percevoir les spécificités de la linguistique (et les apports d'un tel regard) et construire une réflexion complémentaire à celle de la discipline de sa majeure afin d'enrichir l'étude d'une problématique.

COURSE PREREQUISITES

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "*In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?*"

Access Requirements

Specific Admission Requirements

The programme is open to all Bachelor students if their main programme permits.

Teaching method

The courses make use of a variety of teaching techniques and strategies (lectures, group work, individual work, seminars, reading etc.) which help students to acquire the necessary skills. Certain courses also use e-learning techniques (provision of resources and exercises, teaching devices, collective sharing and assessment of work).

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

According to the type of course, there are different forms of assessment. Certain courses have traditional oral and/or written assessments (which take place in the examination periods in January, June and August/September), while seminars involve student participation throughout the semester and the assessment of individual work. Further details on the assessment method are given at the beginning of each course.

Course examinations on communication skills are designed to test performance, that is to say practical use of the language in meaningful situations, which demonstrate students' level of ability.

Teaching activities are assessed in accordance with the rules currently in force at the University (see [General Examination Regulations](#)). Students may also find additional information on the particular methods of assessment in the course descriptions.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits.

Possible trainings at the end of the programme

All UCLouvain Bachelors, with the [Minor in Linguistics](#) give access to [Master \[120\] in Linguistics](#).
