MNUC2MC - Introduction

Introduction

MNUC2MC - Teaching profile

Learning outcomes

This complementary master's programme aims to prepare doctors to become recognised holders of the specific professional title of specialist doctor in Nuclear Medicine (Ministerial decree of 19.07.1996 published on 10.09.1996).

Programme structure

The training course includes full time apprenticeships in recognised services and teaching centres. It lasts for at least five years, (full-time), three years of which consist of foundation studies and two years of higher studies. The apprenticeship project established by the university work promoter must be approved by the ministerial validation committee for the speciality. These periods of practical training include being on call.

○ WINTR2382	Stages cliniques de médecine interne, 2e année, 1re partie			30 Credits	q1+q2		x			
○ WINTR2392	Stages cliniques de médecine interne, 2e année, 2e partie			18 Credits	q3		x			

o Troisième bloc annuel (60 crédits)

o Enseignement théorique obligatoire (18 crédits)

Le médecin candidat spécialiste choisit 18 crédits parmi la liste des cours ci-dessous et il doit avoir suivi l'ensemble de cet enseignement au plus tard à la fin du 4e bloc annuel.

○ LPHY2360	Physique atomique, nucléaire et des radiations	Krzysztof Piotrzkowski	22.5h	2 Credits					x	x
○ WMNUC3120	Techniques de mesures et démonstrations	Michel Hesse	15h+30h	3 Credits					x	x
○ WESP1010	Introduction à la statistique descriptive et aux probabilités	William D'Hoore (coord.) Séverine Henrard Niko Speybroeck	18h+18h	3 Credits	q1				x	x
○ WRFAR2100	Radiochemistry, radiotoxicology & radiopharmacy	Bernard Gallez	22.5h +60h	4 Credits	q1				x	x
○ WRPR2001	Notions de base de radioprotection	Pascal Carlier Michaël Dupont François Jamar (coord.) Renaud Lhommel	10h+5h	2 Credits	q1				x	x
○ WRPR2002	Compléments de radioprotection	Philippe Clapuyt Michaël Dupont François Jamar (coord.)	20h+10h	3 Credits	q2				x	x
○ WBICL2107	Principe et méthodologie des dosages immunologiques	Diane Maisin	15h	3 Credits	q2				x	x
○ WRPR3010M	Questions spéciales de radioprotection (partim)	François Jamar (coord.)	15h	2 Credits	q2				x	x

o Stages (42 crédits)

○ WMNUC2383	Stages cliniques de médecine nucléaire 3e année, 1re partie			28 Credits	q1+q2				x	
○ WMNUC2393	Stages cliniques de médecine nucléaire 3e année, 2e partie			14 Credits	q3				x	

o Quatrième bloc annuel (60 crédits)

o Enseignement théorique obligatoire (18 crédits)

Le médecin candidat spécialiste choisit 18 crédits parmi la liste des cours ci-dessous et il doit avoir suivi l'ensemble de cet enseignement au plus tard à la fin du 4e bloc annuel.

○ LPHY2360	Physique atomique, nucléaire et des radiations	Krzysztof Piotrzkowski	22.5h	2 Credits					x	x
○ WMNUC3120	Techniques de mesures et démonstrations	Michel Hesse	15h+30h	3 Credits					x	x
○ WESP1010	Introduction à la statistique descriptive et aux probabilités	William D'Hoore (coord.) Séverine Henrard Niko Speybroeck	18h+18h	3 Credits	q1				x	x
○ WRFAR2100	Radiochemistry, radiotoxicology & radiopharmacy	Bernard Gallez	22.5h +60h	4 Credits	q1				x	x
○ WRPR2001	Notions de base de radioprotection	Pascal Carlier Michaël Dupont François Jamar (coord.) Renaud Lhommel	10h+5h	2 Credits	q1				x	x
○ WRPR2002	Compléments de radioprotection	Philippe Clapuyt Michaël Dupont François Jamar (coord.)	20h+10h	3 Credits	q2				x	x
○ WBICL2107	Principe et méthodologie des dosages immunologiques	Diane Maisin	15h	3 Credits	q2				x	x
○ WRPR3010M	Questions spéciales de radioprotection (partim)	François Jamar (coord.)	15h	2 Credits	q2				x	x
○ WMNUC2344	Utilisation des radioisotopes	François Jamar (coord.)	50h	8 Credits						x
○ WMNUC2354	Démonstrations, techniques et protocoles de médecine nucléaire in vivo	François Jamar (coord.)	30h	4 Credits						x

o Stages (42 crédits)

○ WMNUC2384	Stages cliniques de médecine nucléaire 4e année, 1re partie			28 Credits	q1+q2					x
○ WMNUC2394	Stages cliniques de médecine nucléaire 4e année, 2e partie			14 Credits	q3					x

o Cinquième bloc annuel (60 crédits)

o Cours au choix (2 crédits)

Le médecin choisit deux crédits, notamment dans le domaine du radiodiagnostic (RDGN) ou le cours suivant :

Year

						1	2	3	4	5
⌘ WRDGN2120	Neuroradiology	Thierry Duprez	15h	2 Credits	q1					x

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "*In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?*"

The document is available by clicking [this link](#) after being authenticated with your UCLouvain account.

MNUC2MC - Information

Access Requirements

*In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.
Decree of 7 November 2013 defining the landscape of higher education and the academic organization of studies.
The admission requirements must be met prior to enrolment in the University.*

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

- [General access requirements](#)
- [Specific access requirements](#)

General access requirements

Subject to the general requirements laid down by the academic authorities, admission to the specialized Master's degree programme will be granted to students who fulfil the entry requirements for studies leading to the award of a Master's (second-cycle) degree and who hold a second-cycle diploma, degree, certificate or other qualification issued within or outside the French Community of Belgium, or whose prior learning or experience has been accredited by the Examination Board as being equivalent to at least 300 credits.

Specific Admission Requirements

Specific Admission Requirements

Admission conditions

- The applicant must hold the degree title of Doctor in Medicine or be a Doctor from a member country of the European Union authorising medical practice in Belgium.
- The applicant must be in possession of a document attesting that, at the end of the selection exams, he was retained as a specialist candidate in Nuclear medicine, in a Belgian medical faculty.

The juridical context and practical procedures regarding these selection tests can be obtained from the secretary's office. Degree holders from outside the European Union are only allowed to register on the programme in the context of procuring a university certificate for partially specialised training for the duration of two years (if they are in the process of doing a specialisation in their country of origin) or for an in-depth specialised training course for the duration of one year (if they are already recognised as specialists in their own country).

The Royal Decree of the 30.05.2002, relating to the planning of the medical offer for the public, published on the 14.06.2002, applies to those candidates wishing to obtain the title of Specialist Doctor in Nuclear Medicine (those candidates are thus counted among the general practitioner candidates or specialists in the context of the numerus clausus).

Admission procedures

Applications for admission must be addressed to the academic supervisor. The organisation of the entrance selection tests is arranged in accordance with the calendar and the general examination rules and regulations.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Further to the application of the Royal Decree of 16 March, 1999, at the end of the first two years of training, the candidate will receive an attestation proving that he has successfully accomplished a specific university training course. A thesis, based on the conditions laid down by the Ministerial Decree of 19 July, 1996, will be presented and defended orally. Upon fulfilment of the above-described training requirements, the teaching committee will award the academic title in Nuclear

Medicine.

This title does not replace official recognition by the ministerial validation committee. It attests the successful completion of an academic and scientific study programme in the context of specialised training leading to this validation.
