DATI2M - Introduction

Introduction

Introduction

The digital transformation of society has led to explosive growth in the volume of data available. Most of the players in society now place great importance on using this data to help make objective decisions and develop their disciplinary focus. These specific needs have resulted in the emergence of **new data-oriented careers**.

The engineering master's in data science offers a course in **scientific methods and technology tools** for answering social or scientific questions based on **the processing of frequently massive data sets** ("big data"). This discipline usually requires a structured model of the problem in question to be combined with statistics and mathematics to deliver a rigorous, quantitative, operational solution to the question posed. Computer infrastructure and complex calculation algorithms thus complement scientific methods in structuring and processing the data.

The **fields of application** of data science are extremely varied: political and security decision-making, real-time online advertising, e-commerce, processing network data, processing financial and industrial production data, biomedical research based on omics or imaging data.

Your future job

Your degree in data science prepares you for the posts of data scientist, data analyst, data and analytics manager or data engineer and equips you to take on responsibilities in these areas.

Your programme

The data science programme draws on four common foundations:

- Data structures and data processing algorithms.
- Theories of learning, data mining and viewing multidimensional data.
- Statistical inference and modelling.
- Applications.

DATI2M - Teaching profile

Learning outcomes

On successful completion of this programme, each student is able to :

1. Démontrer la maîtrise d'un solide corpus de connaissances en sciences des données, lui permettant de résoudre les problèmes qui relèvent de sa discipline
 - 1.1. Les structures de données et algorithmes pour l'analyse de données
 - 1.2. Les théories de l'apprentissage, la fouille de données et la visualisation de données de grande dimension
 - 1.3. L'inférence statistique, la modélisation et l'informatique statistique. L'étudiant dans l'orientation technologies de l'information se spécialise via des cours obligatoires ou au choix
 - 1.4. Les aspects industriels et entrepreneuriaux de la science des données. L'étudiant dans l'orientation en technologies de l'information se spécialise via une option
 - 1.5. Les systèmes informatiques, y compris le calcul distribué, le calcul embarqué, les réseaux et la sécurité
 - 1.6. Les méthodes numériques et l'optimisation, y compris la programmation par contraintes, la recherche opérationnelle, l'identification et les mathématiques appliquées
2. Organiser et de mener à son terme une démarche de développement d'un système d'exploitation des données répondant aux besoins généralement complexes d'un client.
 - 2.1. Analyser le problème à résoudre ou les besoins fonctionnels à rencontrer et formuler le cahier des charges correspondant.
 - 2.2. Formaliser et modéliser le problème et concevoir une ou plusieurs solutions techniques originales répondant à ce cahier des charges.
 - 2.3. Evaluer, justifier et classer les solutions au regard de l'ensemble des critères figurant dans le cahier de charges : efficacité, faisabilité, qualité, pertinence et sécurité.
 - 2.4. Implémenter, tester et valider la solution retenue et en interpréter les résultats.
 - 2.5. Formuler des recommandations pour améliorer le caractère opérationnel de la solution.
3. Organiser et de mener à son terme un travail de recherche pour appréhender une problématique inédite liée à l'exploitation de données selon une méthodologie ou dans un environnement nouveau.
 - 3.1. Se documenter et résumer l'état des connaissances actuelles dans le domaine considéré.
 - 3.2. Proposer une modélisation et/ou un dispositif expérimental permettant de simuler et de tester des hypothèses relatives au problème étudié.
 - 3.3. Mettre en forme un rapport de synthèse visant à décrire la méthodologie avec rigueur et expliciter les potentialités d'innovation théoriques et/ou techniques résultant de ce travail de recherche.
4. Contribuer en équipe à la conduite d'un projet d'exploitation de données et le mener à son terme en tenant compte des objectifs, des ressources allouées et des contraintes qui le caractérisent.
 - 4.1. Cadrer et expliciter les objectifs d'un projet (en y associant des indicateurs de performance) compte tenu des enjeux et des contraintes qui caractérisent l'environnement du projet.
 - 4.2. S'engager collectivement sur un plan de travail, un échéancier et des rôles à tenir.
 - 4.3. Fonctionner dans un environnement pluridisciplinaire, conjointement avec d'autres acteurs porteurs de différents points de vue : gérer des points de désaccord ou des conflits.
 - 4.4. Prendre des décisions en équipe lorsqu'il y a des choix à faire : que ce soit sur les solutions techniques ou sur l'organisation du travail pour faire aboutir le projet.
5. Communiquer efficacement oralement et par écrit en vue de mener à bien les projets qui lui sont confiés dans son environnement de travail (en particulier en anglais).
 - 5.1. Identifier clairement les besoins du « client » ou de l'utilisateur : questionner, écouter et comprendre toutes les dimensions de sa demande et pas seulement les aspects techniques.
 - 5.2. Argumenter et convaincre en s'adaptant au langage de ses interlocuteurs : techniciens, collègues, clients, supérieurs hiérarchiques.
 - 5.3. Communiquer sous forme graphique et schématique ; interpréter un schéma, présenter les résultats d'un travail, structurer des informations.
 - 5.4. Lire, analyser et exploiter des documents techniques (diagrammes, manuels, cahiers de charge...).
 - 5.5. Rédiger des documents écrits en tenant compte des exigences contextuelles et des conventions sociales en la matière.
 - 5.6. Faire un exposé oral convaincant en utilisant les techniques modernes de communication.
6. Faire preuve à la fois de rigueur, d'ouverture, d'esprit critique et d'éthique dans son travail.
 - 6.1. Appliquer les normes en vigueur dans les disciplines de la science des données (terminologie, mesures de qualité, ...).
 - 6.2. Trouver des solutions qui vont au-delà des enjeux strictement techniques, en intégrant les enjeux de dimension éthique d'un projet (y compris la confidentialité des données et la protection de la vie privée) et de développement durable
 - 6.3. Faire preuve d'esprit critique vis-à-vis d'une solution technique pour en vérifier la robustesse et minimiser les risques qu'elle présente au regard du contexte de sa mise en Œuvre.
 - 6.4. S'autoévaluer et développer de manière autonome les connaissances nécessaires pour rester compétent dans son domaine.

Programme structure

For a programme-type, and regardless of the focus, options/or elective courses selected, this master will carry a minimum of 120 credits divided over two annual units, corresponding to 60 credits each.

MAJOR IN CRYPTOGRAPHY AND INFORMATION SECURITY

As with the Master's degree engineering programmes in electricity, computer sciences and applied mathematics, this major provides students with the knowledge of fundamental algorithms and mathematics in order to better understand information security as well as the design and implementation of solutions for problems related to electronic circuits and information systems.

● Mandatory

o Content:

The elective courses being recommended and available for Master students in Data Sciences Engineering are listed here above, in the majors and other lists of elective courses. However, a student can further suggest other courses that would be relevant for his/her personal curriculum, pending that this is compliant with the rules for setting up a personal Master program.

⊗ Languages

Students may select from any language course offered at the ILV. Special attention is placed on the following seminars in professional development:

⊗ LALLE2500	Professional development seminar German	Caroline Klein (coord.)	30h	3 Credits	q1+q2	x	x
⊗ LALLE2501	Professional development seminar-German	Caroline Klein (coord.)	30h	5 Credits	q1+q2	x	x
⊗ LESPA2600	Vocational Induction Seminar - Spanish (B2.2/C1)	Paula Lorente Fernandez (coord.)	30h	3 Credits	q1	x	x
⊗ LESPA2601	Vocational Induction Seminar - Spanish (B2.2/C1)	Paula Lorente Fernandez (coord.)	30h	5 Credits	q1	x	x
⊗ LNEER2500	Seminar of Entry to professional life in Dutch - Intermediate level	Isabelle Demeulenaere (coord.) Marie-Laurence Lambrecht	30h	3 Credits	q1 or q2	x	x
⊗ LNEER2600	Seminar of entry to professional life in Dutch - Upper-Intermediate level	Isabelle Demeulenaere (coord.)	30h	3 Credits	q1 or q2	x	x

⊗ Group dynamics

⊗ LEPL2351	Group dynamics - Q1		15h+30h	3 Credits	q1	x	x
⊗ LEPL2352	Group dynamics - Q2		15h+30h	3 Credits	q2	x	x

⊗ Autres UEs hors-EPL

L'étudiant-e peut choisir maximum 8 ects de cours hors EPL considérées comme non-disciplinaires par la commission de diplôme

Course prerequisites

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

DATI2M - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

SUMMARY

- > [General access requirements](#)
- > [Specific access requirements](#)
- > [University Bachelors](#)

- > [Admission and Enrolment Procedures for general registration](#)

Specific access requirements

This programme is taught in English with no prerequisite in French. The student is supposed to have at least a B2 level in the European Framework of Reference. A certificate is required for the holders of a non-Belgian degree, see [selection criteria](#) of the Access on the file.

University Bachelors

Diploma	Special Requirements	Access	Remarks
UCLouvain Bachelors			
Bachelor in Computer Science		Direct access	
Bachelor in Engineering		Direct access	
Other Bachelor	Minor in Computer Sciences or Minor in Engineering Sciences: Applied Mathematics (only available for reenrolment) .	Access based on application	Maximum 60 additional credits integrated into their Masters's degree programme.
Others Bachelors of the French speaking Community of Belgium			
Bachelor in Computer Sciences		Direct access	
Bachelor in Engineering Sciences		Direct access	
Other Bachelor		Access based on application	Students who have not taken the equivalent of a "Minor in Computer Sciences" or a "Minor in Engineering Sciences : Applied Mathematics" may have an adapted programme with up to 60 additional credits .
Bachelors of the Dutch speaking Community of Belgium			
Bachelor in Computer Sciences		Direct access	
Bachelor in Engineering Sciences		Direct access	
Other Bachelors		Access based on application	See "Personalized access"
Foreign Bachelors			
Bachelor in Computer Sciences		Access based on application	See "Personalized access"

Non university Bachelors

> Find out more about [links](#) to the university

Diploma	Access	Remarks
BA en informatique de gestion - EPS - crédits supplémentaires entre 30 et 60	Les enseignements supplémentaires éventuels peuvent être consultés dans le module complémentaire .	Type court
BA en informatique de gestion - HE - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (informatique industrielle) - EPS - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (informatique industrielle) - HE - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (réseaux et télécommunications) - EPS - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (réseaux et télécommunications) - HE - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (sécurité des systèmes) - HE - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (sécurité des systèmes) - EPS - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (technologie de l'informatique) - EPS - crédits supplémentaires entre 30 et 60		
BA en informatique et systèmes (technologie de l'informatique) - HE - crédits supplémentaires entre 30 et 60		

Holders of a 2nd cycle University degree

Diploma	Special Requirements	Access	Remarks
"Licenciés"			

Masters

Holders of a non-University 2nd cycle degree

Access based on validation of professional experience

> It is possible, under certain conditions, to use one's personal and professional experience to enter a university course without having the required qualifications. However, validation of prior experience does not automatically apply to all courses. Find out more about [Validation of priori experience](#).

Access based on application

Admission on the basis of a submitted dossier may be granted either directly or on the condition of completing additional coursework of a maximum of 60 ECTS credits, or refused.

The first step of the admission procedure requires to submit an application online : <https://uclouvain.be/en/study/inscriptions/futurs-etudiants.html>

[Selection criteria are summarized here](#) (contact : epl-admission@uclouvain.be).

Admission and Enrolment Procedures for general registration

Supplementary classes

To access this Master, students must have a good command of certain subjects. If this is not the case, they must add supplementary classes at the beginning of their Master's programme in order to obtain the prerequisites for these studies.

○ Mandatory

△ Courses not taught during 2021-2022

⊕ Periodic courses taught during 2021-2022

⊗ Optional

⊖ Periodic courses not taught during 2021-2022

■ Activity with requisites

Click on the course title to see detailed informations (objectives, methods, evaluation...)

⊗ Mathématique - Analyse et algèbre linéaire

L'étudiant choisit un des modules suivants :

⊗ Module 1

○ LINFO1111	Analysis	François Glineur Roland Keunings	45h+37.5h	7 Credits	q1
○ LINFO1112	Algebra	Christophe Craeye Enrico Vitale	30h+30h	5 Credits	q2

⊗ Module 2

○ LINGE1114	Mathematics I: analysis	Heiner Olbermann	30h+30h	5 Credits	q1
○ LINGE1121	Mathematics II: algebra and matrix calculus	Tom Claeys	30h+30h	5 Credits	q2

○ Probabilités et statistique

L'étudiant choisit un des modules suivants :

⊗ Module 1

○ LBIR1315	Probability and statistics II	Patrick Bogaert	22.5h+22.5h	3 Credits	q1
○ LBIR1212	Probabilities and statistics (I)	Patrick Bogaert	30h+15h	4 Credits	q1

⊗ Module 2

○ LEPL1108	Mathématiques discrètes et probabilité	Jean-Charles Delvenne Olivier Pereira	30h+30h	5 Credits	q1
○ LEPL1109	Statistics and data sciences	Donatien Hainaut Laurent Jacques	30h+30h	5 Credits	q1

○ Programmation et informatique

○ LINFO1101	Introduction à la programmation	Kim Mens Siegfried Nijssen Charles Pecheur	30h+30h	5 Credits	q1
○ LINFO1104	Concepts des langages de programmation	Peter Van Roy	30h+30h	5 Credits	q2
○ LEPL1402	Informatique 2	Ramin Sadre Pierre Schaus	30h+30h	5 Credits	q1

○ Un cours parmi :

⊗ LINMA2111	Discrete mathematics II : Algorithms and complexity	Vincent Blondel Jean-Charles Delvenne	30h+22.5h	5 Credits	q1
⊗ LINFO1121	Algorithmique et structures de données	Pierre Schaus	30h+30h	5 Credits	q1

⊗ Systèmes informatiques :

○ LINFO1341	Réseaux informatiques	Olivier Bonaventure	30h+30h	5 Credits	q2
○ LINFO1252	Systèmes informatiques	Etienne Riviere	30h+30h	5 Credits	q1

⊗ Méthodes numériques et optimisation :

○ LINMA1702	Optimization models and methods I	François Glineur	30h+22.5h	5 Credits	q2
-------------	---	------------------	-----------	-----------	----

○ Un cours parmi :

○ LEPL1104	Méthodes numériques	Vincent Legat	30h+30h	5 Credits	q2
○ LINFO1113	Algorithmique numérique	Loïc Quertenmont	30h+30h	6 Credits	q1

⌘ Other EU to be determined with the Study Advisor

Depending on his / her previous academic background, the student (in consultation with the study advisor) can add other UEs in order to acquire the necessary prerequisites for the program.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".
