## MINMATH - Introduction

### Introduction

---

## MINMATH - Teaching profile

### Learning outcomes

By the end of the course the student will have strengthened the disciplinary knowledge useful in undertaking a Master in mathematics or in closely related fields.

In particular, he will be capable of :

- choosing and using the fundamental methods and tools of calculation to solve mathematical problems;
- recognise the fundamental concepts of important current mathematical theories. The student will have developed his capacity for abstract thought and his critical spirit and will in particular be able to:
  - argue within the context of the axiomatic method.
  - identify the key arguments and the structure of a proof, and also construct a proof independently.
  - evaluate the rigour of a mathematical or logical argument and identify any possible flaws in it.

### Programme

#### DETAILED PROGRAMME BY SUBJECT

Courses may be spread over the second and third years of the Bachelor programme, while respecting the various prerequisites detailed in the course descriptions.

- Mandatory
- ⊗ Optional
- △ Not offered in 2021-2022
- ⊙ Not offered in 2021-2022 but offered the following year
- ⊕ Offered in 2021-2022 but not the following year
- △ ⊕ Not offered in 2021-2022 or the following year
- Activity with requisites
- [FR] Teaching language (FR, EN, ES, NL, DE, ...)

30 crédits

Year

**2 3**

#### o Content:

##### o Tronc commun

Courses LMAT1231 and LMATH1241 are compulsory. The student will choose at least one course from LMAT1221 and LMAT1222.

○ LMAT1231	Multilinear algebra and group theory	Pierre-Emmanuel Caprace	FR [q1] [30h+30h] [5 Credits]	X	X
○ LMAT1241	Geometry II	Pierre Bieliavsky	FR [q2] [45h+30h] [6 Credits]	X	X
⊗ LMAT1221	Mathematical analysis : integration	Heiner Olbermann	FR [q1] [30h+30h] [5 Credits]	X	X
⊗ LMAT1222	Complex analysis 1	Tom Claeys	FR [q2] [30h+15h] [5 Credits]	X	X

##### o Cours au choix

The student will complete the programme with courses chosen from the list shown below, in such a way as to total 30 credits.

⊗ LMAT1223	Differential equations	Heiner Olbermann	FR [q2] [30h+15h] [5 Credits]	X	X
⊗ LMAT1261	Mécanique lagrangienne et hamiltonienne	Christian Hagendorf	FR [q1] [22.5h+30h] [5 Credits]	X	X
⊗ LMAT1323	Topology	Pedro Dos Santos Santana Forte Vaz	FR [q1] [30h+15h] [4 Credits]	X	X
⊗ LMAT1321	Functional analysis and partial differential equations	Jean Van Schaftingen	FR [q1] [45h+45h] [7 Credits]	X	X
⊗ LMAT1331	Commutative algebra	Pierre-Alain Jacqmin (compensates Marino Gran)	FR [q2] [30h+15h] [4 Credits]	X	X

				Year	
				2	3
⌘ LMAT1342	Geometry 3	Pascal Lambrechts	FB [q1] [30h+30h] [5 Credits]	x	x
⌘ LPHYS2211	Group theory	Philippe Ruelle	BN [q2] [22.5h+22.5h] [5 Credits]	x	x

## THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

## MINMATH - Information

### Access Requirements

---

#### Specific access requirements

The minor in mathematics is accessible to all Bachelor students whose programme allows it: see the summary table of the different minors.

It is especially recommended to Bachelor students whose major programme contains a solid basic training in mathematics. Particularly concerned are Bachelor students in management, in engineering science: civil engineering, in engineering science: architectural engineer, and in physics.

### Evaluation

---

***The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".***

### Possible trainings at the end of the programme

---

Majors-minors which offer direct access to the master(s):

Students with baccalaureates in physical science or engineering science, civil engineering elective or architectural civil engineering elective, will be admitted to the master's in mathematical science, possibly with a program adapted to suit their needs. Any student who is considering this possibility is asked to make contact as soon as possible with the conseiller aux études (course adviser) for the department of mathematics.
