Introduction

MINNEER - Teaching profile

Learning outcomes

On successful completion of this programme, each student is able to :

1.

2.

3.

1. Attain competence in communication in Dutch and the Dutch language at level B2+ (Common European Framework of Reference for Languages)

2. Develop in-depth analysis of the phenomena, questions or problems connected to Dutch studies and supplementary to those studied on the major; in particular, a deeper comprehension of a linguistic corpus of oral/written texts, literary texts that are contemporary or the product of the periods studied or a cultural, aesthethic and linguistic subject with a connection to the Dutch-speaking world.

3. Demonstrate an in-depth understanding and be able to use a variety of critical analysis tools where relevant for Dutch studies, in particular, according to the student's preference, in the field of linguistics (general linguistics and applied Dutch linguistics, contrastive linguistics, discourse analysis) and of the two literary and cultural studies (text study, literary theory and plot analysis, the history of literature and ideas in Dutch-speaking countries, aesthetics, comparative literature)

4. Comprehend and integrate an interdisciplinary and comparative approach: develop an opinion using what the student has learned (theories, concepts, approaches, etc.) from different fields (linguistics, literary and cultural studies) that have served to provide more in-depth studies of the language and culture of the Dutch-speaking world and that are related to the major in order to rigorously question, analyse and discuss a phenomenon, question or complex problem relating to the field of his or her major and/or relevant to connected fields.

5. Dutch immersion in another institution or overseas. Be able to carry out part of his or her current or future training in a Dutch-speaking institution in Belgium or overseas: Develop in an international and multicultural environment, further the scientific study of another language and literature from a cross-cultural perspective, articulate disciplinary analysis from different angles and be open to other learning experiences.

Teaching method

The courses make use of a variety of teaching techniques and strategies (lectures, group work, individual work, seminars, reading etc.) which help students to acquire the necessary skills. Certain courses also use e-learning techniques (provision of resources and exercises, teaching devices, collective sharing and assessment of work).

Evaluation

The evaluation methods comply with the regulations concerning studies and exams. More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

According to the type of course, there are different forms of assessment. Certain courses have traditional oral and/or written assessments (which take place in the examination periods in January, June and August/September), while seminars involve student participation throughout the semester and the assessment of individual work. Further details on the assessment method are given at the beginning of each course.

Course examinations on communication skills are designed to test performance, that is to say practical use of the language in meaningful situations, which demonstrate students' level of ability.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits.

Possible trainings at the end of the programme

Depending on the minor chosen, some bachelors may also provide access, directly or through supplementary classes, to other master's programmes, such as:
