GESA2M - Introduction

Introduction

Introduction

The Master 120 in Management Sciences (with work-linked-training) combines academic rigor with a strong and paid presence in companies. It focuses on managerial practices related to the digital transformation of the company, essential to adapt to the constant changes in the economic and technological environment. Improving operational efficiency and customer experience, accessing new markets, innovating products and services, redefining business models... the opportunities of digital transformation of the company are numerous and contribute to maintaining a competitive position in the market.

On completion of this Master's degree, you will have:

- assimilated management theories and concepts with a view to using them effectively and appropriately;
- placed organisations in their socio-economic and institutional context in order to understand the interdependencies between organisation and environment and translate them into management decisions;
- incorporated the challenges of international competition into socially responsible management practices;
- developed (through a professional immersion of at least 200 days during the Master program) the skills and know-how to competently handle the complex and varied challenges that organisations face in managing functions and skills at a strategic, tactical and operational level;
- incorporated the challenges of international competition into socially responsible management practices;

The Master in Management offers you:

- teaching by researchers and experts in the field;
- active teaching methods;
- strengthening of your language skills directly applied to professional management practices: through advanced language courses
- a joint degree with UNamur. You will benefit from the teaching of expert professors from UNamur and UCLouvain and you will graduate from both universities.
- a customisable study experience thanks to the opportunity to follow an option in your favourite field in order to become an expert in the field. In addition to courses specific to digital transformation, you choose your specialisation and option courses, your partner company and the theme of your dissertation.
- a 4-quarter paid internship. You join the teams of professionals from the strategy, marketing, finance and regulatory departments to carry out your internship, which lasts 3 days/week at the beginning of the course and 4 days/week at the end. Throughout this period, you are paid.
- a project dissertation. Your dissertation is directly related to your in-company experience.

Your profile

You:

- meet the admission requirements for this programme;
- wish to use your entrepreneurial skills and transform initiatives into economic and social realities;
- tend towards decision-making and management functions;
- wish to combine theoretical learning with field experience;
- want to build up substantial professional experience during your studies;
- are aiming for excellence in national and international management.

Your future job

A position of responsibility in corporate leadership and management in which you can put into practice your ability to undertake initiatives, transform them into economic realities, organise and ensure the continuity of these activities, seek out the necessary resources and combine them in an appropriate manner.

Our management graduates make a career for themselves in many sectors, including industry (production and operations management), banking and insurance, auditing and large-scale retail, in private companies, public organisations, non-profit organisations, SMEs, multinationals and consultancy firms.

Your programme

The 120-credit Master's programme will comprise:

- a specialization in digital business transformation consisting of 2 seminars including at least 200 days of internship;
- a core curriculum consisting of 6 advanced courses related to management and digital business transformation;
- an advanced language course applied to management;
- 4 specialisation courses and an option of 3 courses;
- a work placement of at least 200 days;
- a project dissertation.

Please note that, depending on your previous experience, some learning units (= prerequisite courses) could be added to your Master programme.

Your parcours

This Master's programme gives access to:

- various advanced Master's degrees
- graduate management school

- teacher training certificate (upper secondary education)

GESA2M - Teaching profile

Learning outcomes

The Master in Management programme **prepares graduates to take up the challenge of becoming socially responsible professionals with a cross-disciplinary approach to the various management functions**.

The **Master in Management** programme develops the transferable skills and expertise required for management functions in public and private, national and international, commercial and non-commercial organisations.

At the end of this programme, the graduate will have developed (in particular through an internship of at least 200 days during the course of the programme) the skills and know-how that will enable them to handle the complex and varied challenges faced by organisations in the management of jobs and skills, either at a strategic, tactical or operational level.

Thus, the Master in Management Sciences specialising in the digital transformation of the company enables students to acquire specific skills in the analysis and management of the digital transformation of the company. In addition, the work-study system allows these skills to be professionalized thanks to the work-study training offered in companies.

On successful completion of this programme, each student is able to :

Preamble

The exit profile of Master in Management graduates is set out in the **LSM competency framework** with the following specifics:

- a background in economics and management studies, with a cross-disciplinary approach to management functions;
- priority skills:
 - a socially responsible mindset;
 - acquired knowledge;
 - experience in an international and multicultural environment;
- the possibility of developing some of these skills in greater depth through their choice of options, tracks, dissertation, internship and exchange.

1. Corporate citizenship

Act consciously, aware of their responsibilities, placing human and ethical considerations at the very heart of their thinking and actions.

1.1 Demonstrate independent reasoning, look critically and consciously at acquired knowledge (both academic and common sense) and managerial practices, in light of emerging circumstances and their outcomes.

1.2 Decide and act by incorporating ethical and humanistic values, integrity, respect for the laws and conventions, solidarity and civic action, and sustainable development.

1.3 Decide and act responsibly, while taking into account the social, economic and environmental, sometimes antinomic, outcomes in the short, medium and long term, for the various stakeholders.

2. Knowledge and Reasoning

Master an active and integrated command of a multidisciplinary body of knowledge (content, methods, models, conceptual frameworks) essential to act expertly in the various areas of management.

2.1 Master the core knowledge of each area of management.

2.2 Master highly specific knowledge in one or two areas of management: advanced and current research-based knowledge and methods.

2.3 Articulate the acquired knowledge from different areas of management.

2.4 Activate and apply the acquired knowledge accordingly to solve a problem.

2.5 Contribute to the development and advancement of the management field.

3. A scientific and systematic approach

Analyze and resolve problems in multidisciplinary and complex management situations using a scientific and systematic approach.

3.1 Conduct a clear, structured, analytical reasoning by applying, and eventually adapting, scientifically based conceptual frameworks and models, to define and analyze a problem.

3.2 Collect, select and analyze relevant information using rigorous, advanced and appropriate methods.

3.3 Consider problems using a systemic and holistic approach: recognize the different aspects of the situation and their interactions in a dynamic process.

3.4 Perceptively synthesize the essential elements of a situation, demonstrating a certain conceptual distance, to diagnose and identify pertinent conclusions.

3.5 Produce, through analysis and diagnosis, implementable solutions in context and identify priorities for action.

4. Innovation and Entrepreneurship

Innovate, initiate and lead change.

4.1 Identify new opportunities, propose creative and useful ideas in situations that require new strategic approaches, break with existing models and paradigms, promote progress and change.

4.2 Initiate, develop and implement ideas around a new product, service, process or organizational structure, having evaluated the risks and remain pragmatic.

4.3 Integrate, collaborate and actively drive forward collective actions for change, and diffuse for social awareness.

4.4 Reflect on and improve the content, processes and goals of professional practices.

5. Work effectively in an international and multicultural environment

Work as an interface between stakeholders with different rationales, belief systems, training, nationalities, cultures ...

5.1 Understand the inner workings of an organization: develop a global approach and integrate the internal logic used, within the organization.

5.2 Position and understand the functioning of an organization, in its local and international socio-economic dimensions and identify the associated strategic issues and operational decisions.

5.3 Understand and establish their own role and scope for action, in the overall operation of the organization, while liaising with the various internal and external stakeholders.

6. Teamwork and leadership

Integrate and work in a team, exercise enlightened leadership within the group.

6.1 Work in a team: join in and collaborate with team members. Be open and take into consideration the different points of view and ways of thinking, manage differences and conflicts constructively, accept diversity.

6.2 Work in a team: join in and collaborate with team members. Be open and take into consideration the different points of view and ways of thinking, manage differences and conflicts constructively, accept diversity.

7. Project Management

Define and manage a project to completion, taking into account the objectives, resources and constraints that characterize the project environment.

7.1 Analyse a project within its environment and define the expected outcomes: identify what is at stake, the required outcomes and the environmental constraints; clearly define the project objectives and associate the performance indicators.

7.2 Organize, manage and control the process: structure and schedule the tasks, identify and allocate human and material resources, coordinate, delegate and supervise the tasks; take into account the anticipated constraints and risks.

7.3 Make decisions and take responsibility for them in an uncertain world: take initiatives and act, anticipate and be proactive, show discernment and good judgment and be prepared to make quick decisions, taking into account multiple factors and uncertainties; accept the risks and consequences of decisions.

8. Communication and Interpersonal Skills

Communicate, converse effectively and convincingly with the stakeholders.

8.1 Express a clear and structured message, both orally and in writing in their mother tongue, in English and ideally, in a third language, adapted to the audience and using context specific communication standards.

8.2 Interact and discuss effectively and respectfully with diverse stakeholders (supervisors, peers, colleagues, clients...) in face-to-face and group contexts, using both verbal and nonverbal communication skills: demonstrate the ability to listen, empathize, be assertive, provide and accept constructive criticism.

8.3 Persuade and negotiate: understand the needs and viewpoints of others, put forward their reasoning in an appropriate, relevant and persuasive manner, able to bring out points of agreement, even in antagonistic situations.

9. Personal and professional development

Display self-knowledge and independence, able to adapt quickly to new situations and involve positively.

9.1 Independent self-starter: set priorities, anticipate and plan work activities within time constraints, rigorous, structured and thorough, even in changing, uncertain environments or crisis.

9.2 Self-awareness and self-control: be aware of and manage their own emotions, able to be objective about their work and behaviour, and recognize their own strengths and weaknesses, accept them and use them in a professional manner.

9.3 Self-motivation: be capable of creating a project in line with their own values and aspirations, confident and motivated in managing the implementation of the project, and persevere in difficult situations.

9.4 Quick study, lifelong learner: quickly and independently assimilate new information and skills needed to evolve in their professional environment, learn from successes and errors in the spirit of lifelong learning.

Programme structure

1. Core courses

It defines the common basis and the programme's orientation in the economics and management of digital transformation, including organisational and strategic credits. Courses are taught at both universities in French or English and offered in hybrid modes.

As part of the ongoing development at LSM to differentiate the content and format of the Master Thesis, the supervision of the Master Project Thesis for the programme will be related to the internship and will take the form of an independent project report on the work done, replacing the internship report. The maximum number of pages will be limited and the focus should be on the main achievements during the work experience period

2. Professional Focus: Digital Enterprise Transformation

Students complete a four-quarter paid internship. Students join teams of professionals from the strategy, marketing, finance and regulatory departments to complete your internship of 3 days/week at the beginning of the course and 4 days/week at the end.

The internship is supervised by both an organisation's tutor and the university's training coordinator (or his representative).

The internship with work-linked-training differs from a standard internship in terms of duration, scope and remuneration.

The internship is accompanied by two seminars to allow the theorisation of practices and the taking of a perspective on professional practices. Regular seminars are organised on themes related to the digital transformation of the company. For each theme, academic theories are studied and put into perspective with professional practices. The regular seminars allow for exchanges aimed at developing the students' ability to take a step back and put things into perspective through dialogue with teachers and professionals.

3. Specialization courses (1 per semester)

4. Option

Course prerequisites

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

GESA2M - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

Specific access requirements

In addition to fulfilling the specific conditions described here below, candidates must provide proof of sufficient command of the **French language** (level B2 of the [Common European Framework of Reference](#)).

Given the organization of courses taught in **English** within the programme, a sufficient command of this language (level B1 of the [Common European Framework of Reference](#)) is strongly recommended.

DIRECT ACCESS OR APPLICATION-BASED ACCESS? PLEASE CHECK THE FOLLOWING TABLES

!!! As part of this Masters degree, the agreement between the student and the company must be signed before the student's enrollment in the program (no later than October 31st), or the enrollment will not be considered as valid (art. 11 of the decree of June 30, 2016 concerning work-linked-training) . !!!

Masters			
Belgian Master 60 credits in Management		Direct access	Possibility of valuation of max. 45 credits.
Belgian Master 60 credits in Economics	Meet the general and specific access requirements	Access based on application	Composition of the programme to be determined according to the student's background and specialization needs. Possibility of possible valuation of credits. If general and specific requirements are met > possibility of access on file with the possible addition of a maximum of 60 additional credits into the master's programme > submit a UCLouvain online access request

Any other Belgian Master's	Meet the general and specific access requirements	Access based on application	If general and specific requirements are met > possibility of access on file with the possible addition of a maximum of 60 additional credits into the master's programme > submit a UCLouvain online access request
Non-Belgian Master's university degree issued by a recognized academic institution	Meet the general and specific access requirements	Access based on application	Composition of the programme to be determined according to the student's background and specialization needs. Possibility of possible valuation of credits. If general and specific requirements are met > submit a UCLouvain online access request

Holders of a non-University 2nd cycle degree

Degrees and titles corresponding to 2nd cycle non-university degrees do not allow access to the programme.

Access based on validation of professional experience

> It is possible, under certain conditions, to use one's personal and professional experience to enter a university course without having the required qualifications. However, validation of prior experience does not automatically apply to all courses. Find out more about [Validation of priori experience](#).

(with the exception of specialized masters).

For professionals who wish to acquire basic training in management sciences, consult [Master \[60\] in Management \(shift schedule\)](#) (Mons site) or [Master \[60\] in Management \(shift schedule\)](#) (Charleroi site).

Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum of 60 ECTS credits, or refused.

In the event of access on file, and depending on the diploma you hold, please refer to the "general and specific conditions of access" which can be downloaded in PDF format by simply clicking on the hyperlinks given in the tables above.

Admission and Enrolment Procedures for general registration

Teaching method

This programme, whose quality has been recognised by external auditors in the EQUIS international accreditation procedure, has the following 3 major strengths:

A professional focus in digital transformation of the company in alternation and an offer of specialisation courses and options allowing to personalise the course

An option (15 ECTS) is necessary to allow the student's management training beyond the interest in digital transformation. Some of the options recommended here could concern entrepreneurship, strategy or a future field of application (procurement, marketing, finance, logistics, etc.)

Teaching that combines academic learning and professional practice

Teaching is provided in a balanced way by teachers who are also active researchers in their field and by professionals selected for their widely recognised experience and expertise. Students must also complete an internship in a company and may also construct their dissertation in response to a problem or mission identified during this internship, in the form of a project dissertation. Links with companies are omnipresent both in the teaching and in the extra-academic activities organised by the school's Corporate Unit.

Teaching methods centered on learning and the development of transversal skills

This is reflected in the almost widespread use of teaching methods geared towards problem solving, collaborative learning (case studies, projects, problems, simulations) and independent work. This approach is developed in conjunction with compulsory readings, theoretical frameworks and lectures and is based on a balance between continuous and final assessment of learning, between individual and group assessments.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Several assessment methods are used in this programme, with a particular focus on what are known as "active" teaching methods, which encourage students to take an active role in the learning process:

- **continuous assessment** of each student's output/acquired knowledge, individually or in groups: presentations, moderation of debates, written reports;
- **ad hoc assessment** of acquired knowledge via written and oral exams after the six-week course block or during the examination sessions.

To find out more about assessment, click on the title of the course to see the course description.

Mobility and/or Internationalisation outlook

This Master with work-linked-training is not compatible with an international exchange period.

Possible trainings at the end of the programme

- [PhD in Management](#) (Louvain-la-Neuve & Mons)
- [Master \[60\] in Information and Communication](#) (Mons)
- [Master \[60\] in Information and Communication](#) (Louvain-la-Neuve)
- [Teacher Training Certificate \(upper secondary education\) - Management \(shift schedule\)](#)
