INGE2M - Introduction

Introduction

Introduction

The Master's 120 credits in Business Engineering is a two-year programme that is intended to strengthen the managerial abilities of students who, on top of their training in management, economics, and quantitative methods, also have a background in technologies (digital technologies, mechanical engineering and processes) and sciences (physics, chemistry).

Your profile

- You have a Bachelor's degree in economics and/or management;
- You have a Bachelor's degree in engineering or science with a minor in management and you wish to strengthen your managerial skills;
- You wish to become an ethical and community-minded leader;
- You are motivated by entrepreneurial drive and a desire to learn how to work effectively in a team;
- You are looking for a high-quality education, based on solid scientific knowledge, in the area of high-tech industry and services;
- You seek to develop concrete in-company experience and participate in the management of complex and innovative projects;
- You wish to develop your skills in the management of technologies.

Your future job

The Master's 120 credits in Business Engineering aims at developing competent leaders who are:

- **Ethical and community-minded** – that is, people who care about broader society, are willing to undertake cultural change for more ethical and sustainable developments, and can contribute to the common good by participating in the design of new political governance;
- **Entrepreneurial and innovative** – that is, people who are willing and able to launch innovative projects, solve complex problems by adopting a systemic perspective, and change business norms;
- **Responsible and inspiring** – that is, people who are free, talented and respectful of the talents of others, profoundly honest and tolerant, and also clear-sighted and dynamic personalities.

Our graduates can access the highest corporate management positions in multiple sectors. Besides consultancy, auditing, banking, sales and retail, graduates in Business Engineering are often found in the process, operations, and environmental management.

Your programme

The programme of the Master's 120 credits in Business engineering is composed of the following four components:

- **Core training.** All master's students must complete focus courses that equip them with the necessary knowledge and competences to achieve excellence and ethics in management in today's challenging world. Through these courses, students acquire a broad and solid grasp of the two forces that are deeply reshaping our society and economy – Resource and Energy Management, and Digital Business Systems – whilst being provided with the appropriate set of methods and guiding principles – Managing Complexity and Corporate Social Responsibility.
- **Business exposure.** Students get acquainted with the practical business environment in several ways. In the first term of the programme, students achieve a Technological Project under the joint supervision of professors and practitioners; the aim is to solve a real business problem and, thereby, to acquire a hands-on learning experience. In the fourth term, students must complete an internship of a minimum of 60 consecutive days. Two seminars also expose students to Current Managerial Issues (through testimonies of high-profile executives) and equip them with Relational and Managerial Competences.
- **Specialized training.** Students acquire in-depth education in some field of management by choosing a Major, that is, a group of five connected courses that focus on a given subject (finance, marketing, supply-chain, ...) or topic (innovation, sustainability, business analytics, ...). Students also hone their knowledge of a specific management issue through the autonomous, critical, and rigorous research they perform for the completion of their Master's thesis.
- **International exposure.** To prepare students for the global environment in which they will evolve, our programmes propose several ways for strengthening their flexibility, intercultural skills, and open-mindedness. Our Exchange Programme allows students to spend the third term of the programme in one of our 130+ partner universities throughout the world. Students who cannot seize this opportunity take a dedicated set of courses – including Cross-cultural Management and Language courses. Students in the Master's 120 credits in Business engineering can also apply to prime international tracks, namely the **CEMS** Master in International Management (exclusive entry point in Belgium) and an array of **double degree** programmes. Students are also regularly presented with global managerial issues and brought into contact with international organizations through a large array of activities.

INGE2M - Teaching profile

Learning outcomes

The Master in Business Engineering prepares the graduate to meet the challenge of **becoming a socially responsible and enterprising expert in management, incorporating technological and industrial aspects and innovation.**

The **Master in Business Engineering** is a programme that develops the skills and expertise necessary for the dialogue between management professions and science- and technology-oriented professions in public or private, commercial or non-commercial organisations. In addition to training in economics and management and quantitative methods, it aims to boost knowledge in science (physics and chemistry) and technologies (energy, electronics and telecommunications, mechanics and procedures).

At the end of this programme (including a required internship in a company or research centre and an optional foreign exchange), the graduate will have developed the skills and knowhow that will allow him to master the complex and varied issues that businesses and industries encounter in managing knowledge, occupations, skills and processes at a strategic or logistical level. He will also be specialised in one or more areas of management:

- functional: human management, marketing, finance, accounting, operations and logistics, information systems and ICT, strategy and innovation, etc.
- or transversal: operational, tactical or strategic levels.

At the end of this programme, the graduate will be:

> **Responsible:** capable of implementing socially responsible management practices in any type of organisation.

> **An Expert:**

- who has acquired in-depth quantitative and methodological skills;
- capable of modelling and formulating management problems and situations in sectors that are highly technological and centred on innovation, among others, with a view to providing solutions and improvements;
- capable of assimilating technological processes and mastering their applications in the industrial and service setting.

> **Enterprising:** capable of grasping and comprehending the complex issues of the innovative sectors and mastering their management.

Aware of the responsibility inherent to his profession, the graduate will have acquired the mindset of a critical participant, capable of making decisions in organisational, technological and innovative environments while putting **ethical and socially responsible management values** at the centre of his concerns. He will have adopted an approach of continuous development that will allow him to be a professional demonstrating expertise, capable of adapting and evolving positively in his environment.

THE COMPETENCY FRAMEWORK

Introduction

The exit profile of the Master in Business Engineering graduate is specified by the **LSM competency framework** with in particular:

- an academic education centred on training in economics and management, quantitative methods, science (physics and chemistry) and technologies (energy, electronics and telecommunications, mechanics and procedures),
- priority given to the following skills:
 - Acting as a socially responsible participant,
 - Mastering knowledge,
 - Managing a project,
 - Innovating and taking action,
 - Applying a scientific approach.
- possibility of developing some of these skills in greater depth through his choice of options, tracks, Master's thesis, internship and exchange.

3. Research training

Students wishing to prepare for the completion of a Doctorate in Management or, more broadly, to learn the methods and domains in research, fundamental and applied, in management have the opportunity to follow the Specialized Focus. The Specialized Focus will develop the student's ability to:

- Identify and locate the different epistemological paradigms characterizing the research in management
- Master the specific methodological modelling approaches and/or empirical, qualitative/quantitative, and design a research platform

On successful completion of this programme, each student is able to :

1. **Corporate citizenship:** Act consciously, aware of their responsibilities, placing human and ethical considerations at the very heart of their thinking and actions.

1.1. Demonstrate independent reasoning, look critically and consciously at acquired knowledge (both academic and common sense) and managerial practices, in light of emerging circumstances and their outcomes.

1.2. Decide and act by incorporating ethical and humanistic values, integrity, respect for the laws and conventions, solidarity and civic action, and sustainable development.

1.3. Decide and act responsibly, while taking into account the social, economic and environmental, sometimes antinomic, outcomes in the short, medium and long term, for the various stakeholders.

2. **Knowledge and reasoning:** Master an active and integrated command of a multidisciplinary body of knowledge (content, methods, models, conceptual frameworks) essential to act expertly in the various areas of management.

- 2.1. Master the core knowledge of each area of management.
 - 2.2. Master highly specific knowledge in one or two areas of management: advanced and current research-based knowledge and methods.
 - 2.3. Articulate the acquired knowledge from different areas of management.
 - 2.4. Activate and apply the acquired knowledge accordingly to solve a problem.
 - 2.5. Contribute to the development and advancement of the management field.
- 3. A scientific and systematic approach:** Analyze and resolve problems in multidisciplinary and complex management situations using a scientific and systematic approach.
- 3.1. Conduct a clear, structured, analytical reasoning by applying, and eventually adapting, scientifically based conceptual frameworks and models, to define and analyze a problem.
 - 3.2. Collect, select and analyze relevant information using rigorous, advanced and appropriate methods.
 - 3.3. Consider problems using a systemic and holistic approach: recognize the different aspects of the situation and their interactions in a dynamic process.
 - 3.4. Perceptively synthesize the essential elements of a situation, demonstrating a certain conceptual distance, to diagnose and identify pertinent conclusions.
 - 3.5. Produce, through analysis and diagnosis, implementable solutions in context and identify priorities for action.
- 4. Innovation and entrepreneurship:** Innovate, initiate and lead change.
- 4.1. Identify new opportunities, propose creative and useful ideas in situations that require new strategic approaches, break with existing models and paradigms, promote progress and change.
 - 4.2. Initiate, develop and implement ideas around a new product, service, process or organizational structure, having evaluated the risks and remain pragmatic.
 - 4.3. Integrate, collaborate and actively drive forward collective actions for change, and diffuse for social awareness.
 - 4.4. Reflect on and improve the content, processes and goals of professional practices.
- 5. Work effectively in an international and multicultural environment:** Work as an interface between stakeholders with different rationales, belief systems, training, nationalities, cultures...
- 5.1. Understand the inner workings of an organization: develop a global approach and integrate the internal logic used, within the organization.
 - 5.2. Position and understand the functioning of an organization, in its local and international socio-economic dimensions and identify the associated strategic issues and operational decisions.
 - 5.3. Understand and establish their own role and scope for action, in the overall operation of the organization, while liaising with the various internal and external stakeholders.
- 6. Teamwork and leadership:** Integrate and work in a team, exercise enlightened leadership within the group.
- 6.1. Work in a team: join in and collaborate with team members. Be open and take into consideration the different points of view and ways of thinking, manage differences and conflicts constructively, accept diversity.
 - 6.2. Exercise enlightened leadership skills: unite and motivate different team members, identify, draw on and develop their skills and talents, guide them towards achieving a common goal, while adapting to time constraints and the changing environment.
- 7. Project management:** Define and manage a project to completion, taking into account the objectives, resources and constraints that characterize the project environment.
- 7.1. Analyse a project within its environment and define the expected outcomes: identify what is at stake, the required outcomes and the environmental constraints; clearly define the project objectives and associate the performance indicators.
 - 7.2. Organize, manage and control the process: structure and schedule the tasks, identify and allocate human and material resources, coordinate, delegate and supervise the tasks; take into account the anticipated constraints and risks.
 - 7.3. Make decisions and take responsibility for them in an uncertain world: take initiatives and act, anticipate and be proactive, show discernment and good judgment and be prepared to make quick decisions, taking into account multiple factors and uncertainties; accept the risks and consequences of decisions.
- 8. Communication and interpersonal skills:** Communicate, converse effectively and convincingly with the stakeholders.
- 8.1. Express a clear and structured message, both orally and in writing in their mother tongue, in English and ideally, in a third language, adapted to the audience and using context specific communication standards.
 - 8.2. Interact and discuss effectively and respectfully with diverse stakeholders (supervisors, peers, colleagues, clients...) in face-to-face and group contexts, using both verbal and nonverbal communication skills: demonstrate the ability to listen, empathize, be assertive, provide and accept constructive criticism.
 - 8.3. Persuade and negotiate: understand the needs and viewpoints of others, put forward their reasoning in an appropriate, relevant and persuasive manner, able to bring out points of agreement, even in antagonistic situations.
- 9. Personal and professional development:** Display self-knowledge and independence, able to adapt quickly to new situations and involve positively.
- 9.1. Independent self-starter: set priorities, anticipate and plan work activities within time constraints, rigorous, structured and thorough, even in changing, uncertain environments or crisis.
 - 9.2. Self-awareness and self-control: be aware of and manage their own emotions, able to be objective about their work and behaviour, and recognize their own strengths and weaknesses, accept them and use them in a professional manner.
 - 9.3. Self-motivation: be capable of creating a project in line with their own values and aspirations, confident and motivated in managing the implementation of the project, and persevere in difficult situations.
 - 9.4. Quick study, lifelong learner: quickly and independently assimilate new information and skills needed to evolve in their professional environment, learn from successes and errors in the spirit of lifelong learning.

Programme structure

The Master's 120 credits in Business Engineering is a two-year programme consisting of four terms of 30 credits.

In this Master, each term is divided in two parts of six weeks. The courses are therefore given intensively during six weeks.

Assessments can be organised at the end of each six-week part or during the examination sessions at the end of the term in addition to the continuous assessment (intermediate tests, individual and group work) that is organised during that part.

ANNUAL BLOCK 1						ANNUAL BLOCK 2

INGE2M Programme

Detailed programme by subject

CORE COURSES [35.0]

In annual block 1, the student must take :

- **focus courses** (30 credits)
- **two seminars** (5 credits)
- **a major, composed of 5 courses**, (25 credits) to be chosen from the list below.

In annual block 2, the student must follow:

- if s.he does not go on exchange, the "**LSM courses (if no exchange)**" including 2 elective courses as well as a language course (15 credits) + **1 Option** (i.e. 3 courses for 15 credits) (see below)
- **the internship** (10 credits)
- **the Master's thesis and its seminar** (20 credits)

If you choose to follow a major and/or an option offered on the Mons site, please note that you can benefit from a financial support for the mobility.

- Mandatory
- ⊗ Optional
- △ Not offered in 2024-2025
- ⊙ Not offered in 2024-2025 but offered the following year
- ⊕ Offered in 2024-2025 but not the following year
- △ ⊕ Not offered in 2024-2025 or the following year
- Activity with requisites
- ⊕ Open to incoming exchange students
- ⊗ Not open to incoming exchange students

OPTION SOURCING AND PROCUREMENT (LLN) [15.0]

The Kronos Group Chair "Strategic Sourcing and Procurement" is the fruit of a collaboration between Kronos Group and Louvain School of Management.

The objective of the Chair is to promote research and education in the sourcing and procurement domain, contributing to fostering the profession to continue its transformation into a value creating and strategic profession.

The research in the Chair aims at empirical, economic and strategic studies of procurement under transformation, in particular the innovative, ethical and environmental dimensions of the area.

For more information : <https://uclouvain.be/en/research-institutes/lidam/core/kronos-chair-in-sourcing-and-procurement.html>

○ Preparatory module (60 credits)

Course prerequisites

There are no prerequisites between course units (CUs) for this programme, i.e. the programme activity (course unit, CU) whose learning outcomes are to be certified and the corresponding credits awarded by the jury before registration in another CU.

The programme's courses and learning outcomes

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

INGE2M - Information

Access Requirements

Master course admission requirements are defined by the French Community of Belgium Decree of 7 November 2013 defining the higher education landscape and the academic organisation of courses.

General and specific admission requirements for this programme must be satisfied at the time of enrolling at the university.

Unless explicitly mentioned, the bachelor's, master's and licentiate degrees listed in this table or on this page are to be understood as those issued by an institution of the French, Flemish or German-speaking Community, or by the Royal Military Academy.

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail.

If general and specific requirements are met > possibility of access on file with the possible addition of a maximum of 60 additional credits into the master's programme > Submit a UCLouvain online access request
Belgian Master's degree compromising at least 45 course credits, at master's level, equivalent to the courses of the Master [120] in Business Engineering of the Louvain School of Management, giving the possibility of obtaining, in one year, the Master [120] in Business Engineering	Meet the general and specific access requirements	Access based on application	If general and specific access requirements are met > possibility to obtain, in one year, the Master's degree 120 credits in Business Engineering > Submit a UCLouvain online access request
Any other Belgian Master's	Meet the general and specific access requirements	Access based on application	If general and specific requirements are met > possibility of access on file with the possible addition of a maximum of 60 additional credits into the master's programme > you must : <ul style="list-style-type: none"> . fill in the prerequisite analysis form and send it back to lsm-belgian-admissions@uclouvain.be and . also submit a UCLouvain online access request
Non-Belgian Master's degree issued by a recognized academic institution	Meet the general and specific access requirements	Access based on application	If general and specific access requirements are met > Submit a UCLouvain online access request
Non-Belgian Master's degree, issued by a recognized academic institution, compromising at least 45 course credits, at master's level, equivalent to the courses of the Master [120] in Business Engineering of the Louvain School of Management, giving the possibility of obtaining, in one year, the Master [120] in Business Engineering	Meet the general and specific access requirements	Access based on application	If general and specific access requirements are met > possibility to obtain, in one year, the Master's degree 120 credits in Business Engineering > Submit a UCLouvain online access request

Holders of a non-University 2nd cycle degree

Degrees and titles corresponding to 2nd cycle non-university degrees do not allow access to the programme.

Access based on validation of professional experience

> It is possible, under certain conditions, to use one's personal and professional experience to enter a university course without having the required qualifications. However, validation of prior experience does not automatically apply to all courses. Find out more about [Validation of priori experience](#).

For professionals who wish to acquire a basic education in management sciences, the [Master \[60\] in Management \(shift schedule\)](#) (entirely in French) is made for you. You can also have a look at the [executive education proposed at the Louvain School of Management](#).

Access based on application

Access based on application : access may be granted either directly or on the condition of completing additional courses of a maximum of 60 ECTS credits, or refused.

Access based on application for (future) holders of a **Belgian or a non Belgian degree**: you must of course meet the general and specific access requirements mentioned in the table above according to the degree you have or will obtain and then you must [complete and submit an online application to UCLouvain and follow the procedure](#)

Admission and Enrolment Procedures for general registration

Before submitting an access request, we invite you to look carefully at the table above and see if access is possible.

If you think you have access to this Master, here is how the procedure will work:

1. You must submit an [online access request](#), after filling in all the required fields and providing the required documents.
2. The central service of the university will check your application.
3. If you have an access on file, the central service will forward your file to the faculty (Louvain School of Management) which will analyse your access in relation to the specific conditions visible in the table above.
4. The positive or negative decision of the faculty is then transmitted to the central service.
5. The central service will check various final elements before sending you the final decision, which will be either a refusal or the "Autorisation d'inscription" document. The latter will allow you to register officially at the university.

Teaching method

The quality of our Master's programme is continuously monitored by external auditors through the EQUIS international accreditation process. In terms of teaching methods, the two main strengths of our programmes are:

- **An education that mixes academic knowledge and professional practice**

Blended training is provided by academics who are top researchers in their fields and professionals, specially selected for their experience and widely renowned expertise. As a result, students are exposed to the latest scientific advances in management studies and their application in business life. Formal teaching is complemented with a hands-on learning experience that students acquire in various ways (group projects in connection with organizations, internship, master's thesis). Students can also access a wide array of extra-curricular activities organised by the School's Corporate Unit.

- **A focus on active learning and the development of multidisciplinary skills**

We have created a learning environment that combines a variety of interactive teaching methods: lectures, case studies, group assignments, individual and group projects, problem-solving, flipped classrooms, business games, invited speakers. To optimize the learning experience, we blend theoretical and practical work, hard and soft skills, as well as in-person and online teaching activities. Courses are bundled in modular parts of six weeks to strengthen the acquisition of knowledge and competences. Exams may be organized at the end of each six-week part to complement the continuous assessment (interim tests, individual and group assignments) that is organized during the part.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Because of our emphasis on active learning, most of the assessment is continuous. That is, students complete individual and group assignments during and after the courses. These assignments can take various forms (written reports, oral presentations, problem-solving, projects, videos, debates, etc.). Examinations can complement the assessment and are organized in the continuation of the teaching after each six-week courses' part. The assessment is both formative (by monitoring student learning and providing ongoing feedback) and summative (by evaluating student learning against some benchmark).

The details of the assessment can be found in the description of each course.

Mobility and/or Internationalisation outlook

This Master's programme offers various internationalisation and mobility opportunities that will add value to your curriculum:

- **A quadrimester abroad** (30 credits) as part of an [exchange programme](#) in one of the 140 worldwide recognised partner universities in management, some of which are part of the exclusive PIM (Partnership in International Management) network, have accreditations such as EQUIS,...
- **A quadrimester in Flanders** (30 credits) as part of the [Erasmus Belgica](#) programme, at one of the 3 recognised partner universities in management.
- The exclusive and unique opportunity in Belgium to follow the [prestigious Master's in International Management](#) organised by the **CEMS** network (available on selection only).
- The opportunity to follow the **annual block 2 abroad** as part of the ['IB' International Business](#) programme, which includes a quadrimester abroad as part of an exchange programme at a partner university and a six-month work placement in a company outside Europe (available on selection only).
- The possibility of acquiring **two Master's degrees** by combining a full year at LSM (UCLouvain) and another full year at a partner university. Several ['DD' double degrees and DDD \(Dedicated Double Degree\)](#) are offered in partnership with 8 prestigious European universities (available on selection only).
- The **possibility** for a student to follow the **entire programme in English**.

Possible trainings at the end of the programme

- [Doctorate in "Economics and Business Management"](#) (Louvain-la-Neuve)
- [Master \[120\] in Environmental Science and Management](#) (Louvain-la-Neuve)
- [Master \[60\] in Information and Communication](#) (Louvain-la-Neuve)
- [Master \[60\] in Information and Communication](#) (Mons)
