GRH2M - Introduction

Introduction

GRH2M - Teaching profile

Learning outcomes

Current changes in societies and organizations affect the management of people in private and public organizations. The Master in Human Resource Management is designed for future professionals in human resource management who will have to work in a changing world and new contexts. Instead of providing them with techniques and tools that would become rapidly obsolete, this programme aims to equip students with the following capacities:

- The capacity to diagnose organizational situations by the mean of rigorous and critical analysis, by identifying different kinds of human resource management and organization, and by clearly understanding the constraints and opportunities offered to HR management;
- The capacity to identify how to bring about improvement and change, and implement them appropriately, given each particular context and the objectives to achieve.

The Master in Human Resource Management is centred on managerial aspects of organizations, rather than personnel administration techniques. It intends to conciliate with the requirements of scientific work with the necessity to operationalize managerial practice. It is designed to develop professional expertise in understanding and taking action in human resource management. For these reason, the programme involves various disciplines: management, public administration, law, psychology and industrial relations. The programme intends to educate professionals who will take up jobs in the HR field, in consulting, in training departments or on the board of different organizations, in private or public companies and in market and non-market organizations.

According to the admission regulations, students must submit a request for admission before official enrolment. This is examined by the academic coordinator together with the management committee.

Teaching method

classes and lectures ;

The programme is multidisciplinary since it combines management, psychology, public administration and industrial relations. The teaching methods are closely connected to the skills that future HR professionals will need: ability to listen and to summarize, to understand an organization, to work in a team, to express themselves both orally and in writing, and to work autonomously and with responsibility. Against this background, the teaching methods bring together:

- Classes and lectures ;
- Case-studies ;
- Team work ;
- Exchange of views with HR professionals ;
- Introduction to a multicultural environment through the foreign exchange program ;
- Experience of professional practice by the means of the internship, together with scientific analysis in the thesis.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

The different kinds of assessment used reflect the aims of the teaching in that they are designed both to judge students' ability to analyse and express themselves and work in a team, for example, as well as their capacity to understand and use relevant scientific literature to analyse a given subject: individual and group work, oral presentations both individually and in groups, written and oral examinations, and individual research combined with analysis of a particular area in the final thesis.

Possible trainings at the end of the programme

- Advanced Masters : none
- Doctoral programmes : doctoral school in management science ; doctoral school in political and social science

Certificates

None currently awarded.
