MINARKE - Introduction

Introduction

MINARKE - Teaching profile

Learning outcomes

Students choosing the foundation minor in discipline aim to discover history of Art and archeology, a different discipline to that of the major, and understand its unique characteristics, its fundamental principles and its demands in the interests of openness and with a view to creating an approach that complements that of the discipline of the major in order to enhance the study of a problem.

On successful completion of this programme, each student is able to :

1. Demonstrate the acquisition of a knowledge base in history of Art and archeology in order to grasp its/their specific features.
2. Demonstrate knowledge and understanding of the basic tools of the history of Art and archeology.
3. Discover and incorporate the robustness required by history of Arts and archeology and display evidence of this incorporation.
4. Discover a capacity for a line of reasoning specific to the history of Arts and archeology.
5. Identify the specific features of the history of Art and archeology and construct a reflective approach that complements that of the discipline of the major in order to enhance the study of a problem.

Programme

THE PROGRAMME'S COURSES AND LEARNING OUTCOMES

For each UCLouvain training programme, a [reference framework of learning outcomes](#) specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

MINARKE - Information

Access Requirements

This programme is open to all Bachelor students if their main programme permits (list of [Bachelors offering this minor](#)). There are no specific terms or conditions of admission for this minor.

Teaching method

The courses make use of a variety of teaching techniques and strategies (lectures, group work, individual work, seminars, reading etc.) which help students to acquire the necessary skills. Certain courses also use e-learning techniques (provision of resources and exercises, teaching devices, collective sharing and assessment of work).

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

According to the type of course, there are different forms of assessment. Certain courses have traditional oral and/or written assessments (which take place in the examination periods in January, June and August/September), while seminars involve student participation throughout the semester and the assessment of individual work. Further details on the assessment method are given at the beginning of each course.

Course examinations on communication skills are designed to test performance, that is to say practical use of the language in meaningful situations, which demonstrate students' level of ability.

Teaching activities are assessed in accordance with the rules currently in force at the University (see [General Examination Regulations](#)). Students may also find additional information on the particular methods of assessment in the course descriptions.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits.
