SOCA1BA - Introduction

Introduction

SOCA1BA - Teaching profile

Learning outcomes

The Bachelor's programme of Sociology and Anthropology aims to :

- provide the students with a theoretical grounding in Sociology and Anthropology and give them the substantial methodological elements of sociological and anthropological analysis of empirical social phenomena, in particular via participation in practical research and on-the-field contact
- situate the special approach of the discipline, both in terms of its specificity and its complementarity, with respect to the approach of other disciplines, especially Philosophy, Economy, Politics, History and Psychology
- develop the students' capacities of critical analysis, reasoning and personal judgement
- help the students to develop their capacity to reflect on the constitution of knowledge, on an epistemological as well as a historical and sociological level
- initiate them in autonomous and individual study, by means of an active pedagogical approach which leaves considerable room for personal and group work and for the acquisition of skills in oral and written communication
- train the students to elaborate reports, respecting the rules of presentation as much as of content (a necessary skill for embarking on the job-market as well as on the master's programme).

On a general level,

- the first year is dedicated to the acquisition of basic knowledge in the main disciplines of Human Sciences and to a session on university study approaches and methods
- the second year is dedicated to the acquisition of primordial methodological tools and conceptual groundings in Sociology and Anthropology
- and the third year is dedicated to the pursuit of the acquisition of fundamental theories and theoretical and methodological tools, as well as to a research work of a more personal nature in the context of a practical seminar on more specific research, revolving around the principal orientations of Sociology and Anthropology.

Programme structure

The first year of the bachelor's programme consists of a common pool of Faculty subjects, as well as specific courses in Sociology and in Anthropology. Thanks to the common pool of subjects, after the January session, the student has the possibility to re-orient himself towards another programme in the Faculty.

The three year programme corresponds to 180 credits, and comprises a major of 150 credits and an option of 30 credits.

So as to widen his intellectual and professional horizons, the student may choose a minor (30 credits) which will enable him to discover another subject ; he may likewise choose to go more deeply into his major by means of an ensemble of options (30 credits).

The choice of the minor and the options selected by the student must be approved by the Programme Supervisor.

The choice of the minor will also facilitate re-orientation when it comes to choosing the master's programme.
The role of the Programme Supervisor and the Study Advisor is important with respect to subject choice (information, advice ...).

Example: for an admission application for the academic year 2024-2025, you must have obtained your diploma during the academic years 2021-2022, 2022-2023 ou 2023-2024. In the French Community of Belgium, the academic year runs from September 14 to September 13

- Candidates, whatever their nationality, with a secondary school diploma **from a country outside the European Union**, must have obtained an average of 13/20 minimum or, failing that, have obtained this average, have passed one year of study in Belgium (for example special Maths / sciences). A non-successful year will not be taken into consideration.

Access based on validation of professional experience

Admission to undergraduate studies on the basis of accreditation of knowledge and skills obtained through professional or personal experience (Accreditation of Prior Experience)

Subject to the general requirements laid down by the authorities of the higher education institution, with the aim of admission to the undergraduate programme, the examination boards accredit the knowledge and skills that students have obtained through their professional or personal experience.

This experience must correspond to at least five years of documented activity, with years spent in higher education being partially taken into account: 60 credits are deemed equivalent to one year of experience, with a maximum of two years being counted. At the end of an assessment procedure organized by the authorities of the higher education institution, the Examination Board will decide whether a student has sufficient skills and knowledge to successfully pursue undergraduate studies.

After this assessment, the Examination Board will determine the additional courses and possible exemptions constituting the supplementary requirements for the student's admission.

Teaching method

Les cours magistraux visent à transmettre une matière tandis que les séminaires et travaux pratiques requièrent une participation active de l'étudiant. Le programme de bachelier combine de manière évolutive ces deux modes d'enseignement. Il s'agit d'acquérir les connaissances de base et les concepts de la sociologie et de l'anthropologie à la fois à travers les cours, les lectures et les travaux personnels. Dès la première année, les étudiants sont amenés à conduire des enquêtes ou à analyser des données. En deuxième année, les étudiants participent à une activité collective résidentielle sous la forme d'un « séminaire d'exploration socio-anthropologique ».

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Ongoing evaluation : exercices and personal pieces of work.

Exams take both written and oral forms.

Mobility and/or Internationalisation outlook

La mobilité Erasmus est organisée au cours du master.

Possible trainings at the end of the programme

Positioning of the programme within the University cursus

The bachelor's of Sociology and Anthropology opens direct access to the master's of Sociology or the master's of Anthropology, delivered by any university institution within the French-speaking Community in Belgium.
