Learning outcomes

After a three-year bachelor, the programme in Master en droit has the dual objective of adding to the student's general training by teaching fundamental subjects (core courses) and providing him with specialist training in subjects more closely linked to his future professional career (focuses and optional courses). The student chooses his specialisation from the coherent set of subjects.

The balance between general training and specialised training should provide the student with the opportunity to acquire legal skills of a highly technical level, aided by skills in critical reflection.

The Master's programme is also intended to help students familiarise themselves with the world of work (internship and dissertation), broaden their linguistic skills (English courses and exchanges with KULeuven) and perfect their training abroad (Erasmus exchanges).

On successful completion of this programme, each student is able to :

Course prerequisites

The **table** below lists the activities (course units, or CUs) for which there are one or more prerequisites within the programme, i.e. the programme CU for which the learning outcomes must be certified and the corresponding credits awarded by the jury before registering for that CU.

These activities are also identified **in the detailed programme** : their title is followed by a yellow square.

Prerequisites and student's annual programme

As the prerequisite is for CU registration puposes only, there are no prerequisites within a programme year. Prerequisites are defined between CUs of different years and therefore influence the order in which the student will be able to register for the programme's CUs.

In addition, when the jury validates a student's individual programme at the beginning of the year, it ensures its coherence, meaning that it may:

- require the student to combine registration in two separate CUs which it considers necessary from a pedagogical point of view.
- transform a prerequisite into a corequisite if the student is in the final year of a degree course.

For more information, please consult the Academic Regulations and Procedures .

 # Prerequisities list

LDROI2200 "Mémoire de fin d'études" has prerequisite(s) LDROI2100 ET LDROI2150

- LDROI2100 - Thesis support seminar
- LDROI2150 - Legal research methodology

The programme's courses and learning outcomes

For each UCLouvain training programme, a reference framework of learning outcomes specifies the the skills expected of every graduate on completion of the programme. Course unit descriptions specify targeted learning outcomes, as well as the unit's contribution to reference framework of learning outcomes.

DROI2M - Information

Teaching method

- Grouping of courses in majors and options: coherence of subjects and creation of teaching teams (especially for options);
- balance between interdisciplinarity and specialization through the choice of teaching units in the options;
- seminar on dissertation supervision and legal research methodology;
- a strong emphasis on internships in all majors.

Cross-disciplinary practical work enables students to apply the skills they have acquired to increasingly specialized issues, in line with their major. In-class case-solving, readings, critical analyses, case law commentaries and doctrinal dissertations prepare students to become legal professionals.

The thesis is an opportunity to study an issue in depth and to draw up an analysis and conclusions.

It is possible to replace a course with a legal internship to be carried out in a professional environment. Lasting a minimum of three weeks, it provides an opportunity to gain first-hand experience of the legal profession.

The combination of different options and majors creates interesting group dynamics and prepares students to work in teams of lawyers or professionals from diverse backgrounds, united around a single legal issue.

Evaluation

The evaluation methods comply with the Academic regulations and procedures . More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

- Examens écrits ou oraux et évaluation continue.
- Les cours du tronc commun font l'objet d'une évaluation ventilée sur des prestations relevant tantôt du cours magistral, tantôt des monitorats et du travail pratique accompagnant ces cours.
- **Pour l'obtention de la moyenne, les notes obtenues pour les unités d'enseignement sont pondérées par leurs crédits respectifs.**

Mobility and/or Internationalisation outlook

The Faculty of Law and Criminology has developed a network with over 80 different universities. Every year, over 160 students take part in exchange programs under the Belgica, Erasmus and Mercator programs.

The Faculty of Law and Criminology offers a number of exchange and mobility programs (each during the second year of the Master's program and subject to selection):

- The possibility of following one of the three following finalities "Privaatrecht en strafrecht", "Publiekrecht" or "Economischrecht" as part of a program organized with the KULeuven. The student spends one year at KULeuven, taking one of these 3 finalities (30 credits) and a choice of teaching units (15 credits), while writing his/her dissertation at UCLouvain. At the end of the course, the student obtains a Master's degree in law issued by UCLouvain, mentioning the program followed during the exchange stay.
- The possibility of taking 30 credits of courses in the first semester at a number of partner universities.
- A "mixed" program carried out partly at UCLouvain and partly at a partner university: students take part of their courses at UCLouvain during the first term, and take electives at a partner university during the second term.
- A specific program dedicated to students in the Business Law main option: a classic mobility program on the UCLouvain side, but providing access to a Master's degree in Business Law in a Global Context at the Université de Montréal.
