

# 2<sup>nd</sup> Carbon Dioxide Conversion Catalysis Virtual Conference

08 - 09 November 2021

The second Carbon Dioxide Conversion Catalysis Virtual Conference will bring together academic and industrial experts focusing on the catalytic conversion of carbon dioxide into value-added products. The conference will feature several relevant topics dealing with either heterogeneous, homogeneous or hybrid forms of catalytic solutions for the production of fine chemicals, pharmaceuticals, polymers and energy vectors.

## Scientific Chairs:

Arjan Kleij (ICIQ) and Paolo Pescarmona (University of Groningen)

## Topic Areas:

- New and improved synthesis of CO<sub>2</sub>-based polymers
- Heterocyclic synthesis
- Photocatalytic & electrocatalytic conversions
- Energy storage using CO<sub>2</sub>
- New recycling strategies
- New catalyst developments
- Biobased synthesis based on CO<sub>2</sub>
- Mechanistic analysis of CO<sub>2</sub> processes
- Industrially relevant CO<sub>2</sub> conversions

## Important Dates:

Talk Submission	30 August 2021
Poster Submission	18 October 2021
Registration Deadline	18 October 2021

# 2<sup>nd</sup> Carbon Dioxide Conversion Catalysis Virtual Conference

08 - 09 November 2021

Shoubhik Das  
University of Antwerp

Giulia Fiorani  
Ca' Foscari University

Gabriella Garbarino  
University of Genova

Annelie Jongerius  
Avantium

Cor Koning  
Covestro

Julio Lloret-Fillol  
ICIQ
